**Fort Discovery celebrates “The Many Faces of Chemistry”
20th Anniversary Celebration of National Chemistry Week**

October 19, 2007— On Saturday, October 20, 2007, The National Science Center's Fort Discovery and The American Chemical Society-Savannah River Local Section will observe the 20th Anniversary of National Chemistry Week by hosting fun and interactive exhibits. This year's theme is “The Many Faces of Chemistry.” Fort Discovery will feature live educational demonstrations of chemistry principles geared toward kids between 10 a.m. and 4 p.m. at the Riverwalk entrance. Demonstrations to be performed include:

- Showing how odors permeate through a balloon
- Separating ink colors by chromatography
- Using Clinistix to determine the amount of sugar in urine

There is no charge for these events, and everyone is welcome! For more information contact Bill Trammell at 706-821-0649.
